MICHAEL ZEILNHOFER PRESENTS
The Evolution of Stars:
White Dwarfs to Black Holes

Tuesday, December 18 at 6:30pm

Michael Zeilnhofer returns to the Kent Library to give another stellar presentation about celestial objects.

There are many different types of stars which have been classified in our universe. Some of these stars out in the universe are much hotter and brighter than our Sun, while some are much cooler. Different types of stars also evolve differently, from white dwarfs to black holes. Join me as we explore the cosmos to learn about how stars evolve and what our Sun will evolve into in the next 4.5 billion years!

Registration is required.
Ages 10 and up.
